

DON'T FLUSH TROUBLE!

Don't throw "flushables" or "disposables" in the toilet...

Please throw them in the trash

THESE ITEMS BELONG IN THE TRASH CAN!

Med. Supplies

Prescription Drugs

Oil

Condoms

Hygiene Products

Hair & Beauty Supplies

The label might say "flushable," but trash, grease and other products are clogging our sewer lines, damaging pumps, and other equipment.

Not only are these problems expensive for the City to repair, they can also cause raw sewage overflows into homes, businesses and waterways.

Repairs from flushable wipes are causing taxpayers in North America over 250 million dollars annually!

**USE THE TRASH CAN,
NOT THE TOILET!**

Do not dispose of HAZARDOUS CHEMICALS into the sanitary sewer system:

****Check with your local landfills for disposal****

Automotive Products

- Antifreeze
- Used oil, brake and transmission fluid
